

CRM Lead List Quality Report

Client-ready data hygiene summary for a CRM or spreadsheet import. This report shows what changed, what still needs review, and which columns are safe enough for automation.

QUALITY SCORE

95.1/100

ROWS CLEANED

6 -> 5

DUPLICATES REMOVED

1

INVALID CONTACTS

2

Import Readiness

Overall quality

Main Warnings

- email has 1 invalid email values.
- phone has 1 invalid phone values.

Recommended Actions

High: Duplicate leads
Import only deduplicated rows and keep the duplicate export for sales ops review.

High: Invalid email values
Route invalid email rows to manual review before email automation or CRM sync.

Medium: Invalid phone values
Keep cleaned E.164 numbers and request corrected phone values for failed rows.

Column Profile

company	text	100%	0%	0	5
source	text	100%	0%	0	5
notes	text	100%	0%	0	5

Cleaned Sample

Name	Email	Phone	Company
Alice Johnson	alice@example.com	+14155550199	Acme Telecom
Bob Smith	bad-email	+14155550188	Beta Wireless
Nora Lee	nora@example.com	not-a-phone	Northstar Fiber
Diego Martins	diego@example.com	+12125550144	MetroNet
Sara Khan		+13125550133	CloudCell

Delivery Notes

- Spreadsheet formula prefixes are neutralized before export.
- Email and phone fields are normalized only when they pass format validation.
- Duplicate removal uses the configured key list. For this sample, the key is email.
- This API validates and cleans CRM import data. It does not enrich private contacts or verify mailbox ownership.
